EVO™ Modular Panel & Cassette Solutions

The Evolution of High-Speed

EVO™ Modular Panel and Cassette Solutions

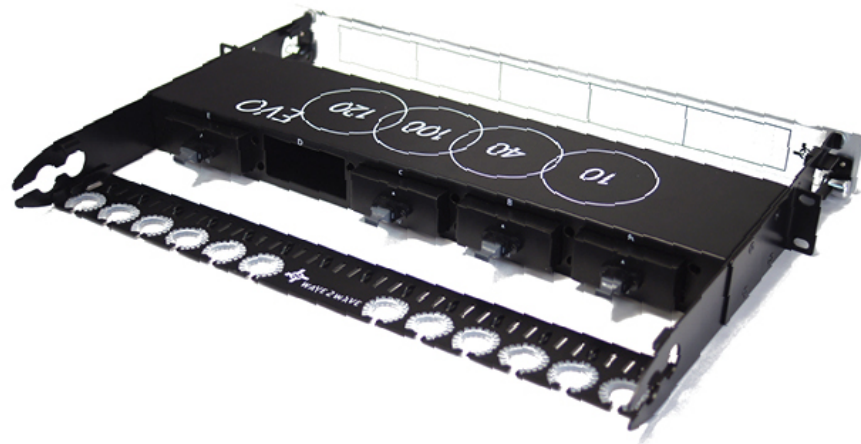

The EVO™ panel family escalades scalability and density to future-proof today's data center environment. Simplicity enhances functionality in dynamic mission critical applications. A single versatile platform supports 10G, 40G and 100/120G throughout the evolving data center architecture. This small package delivers connectivity with elegance.

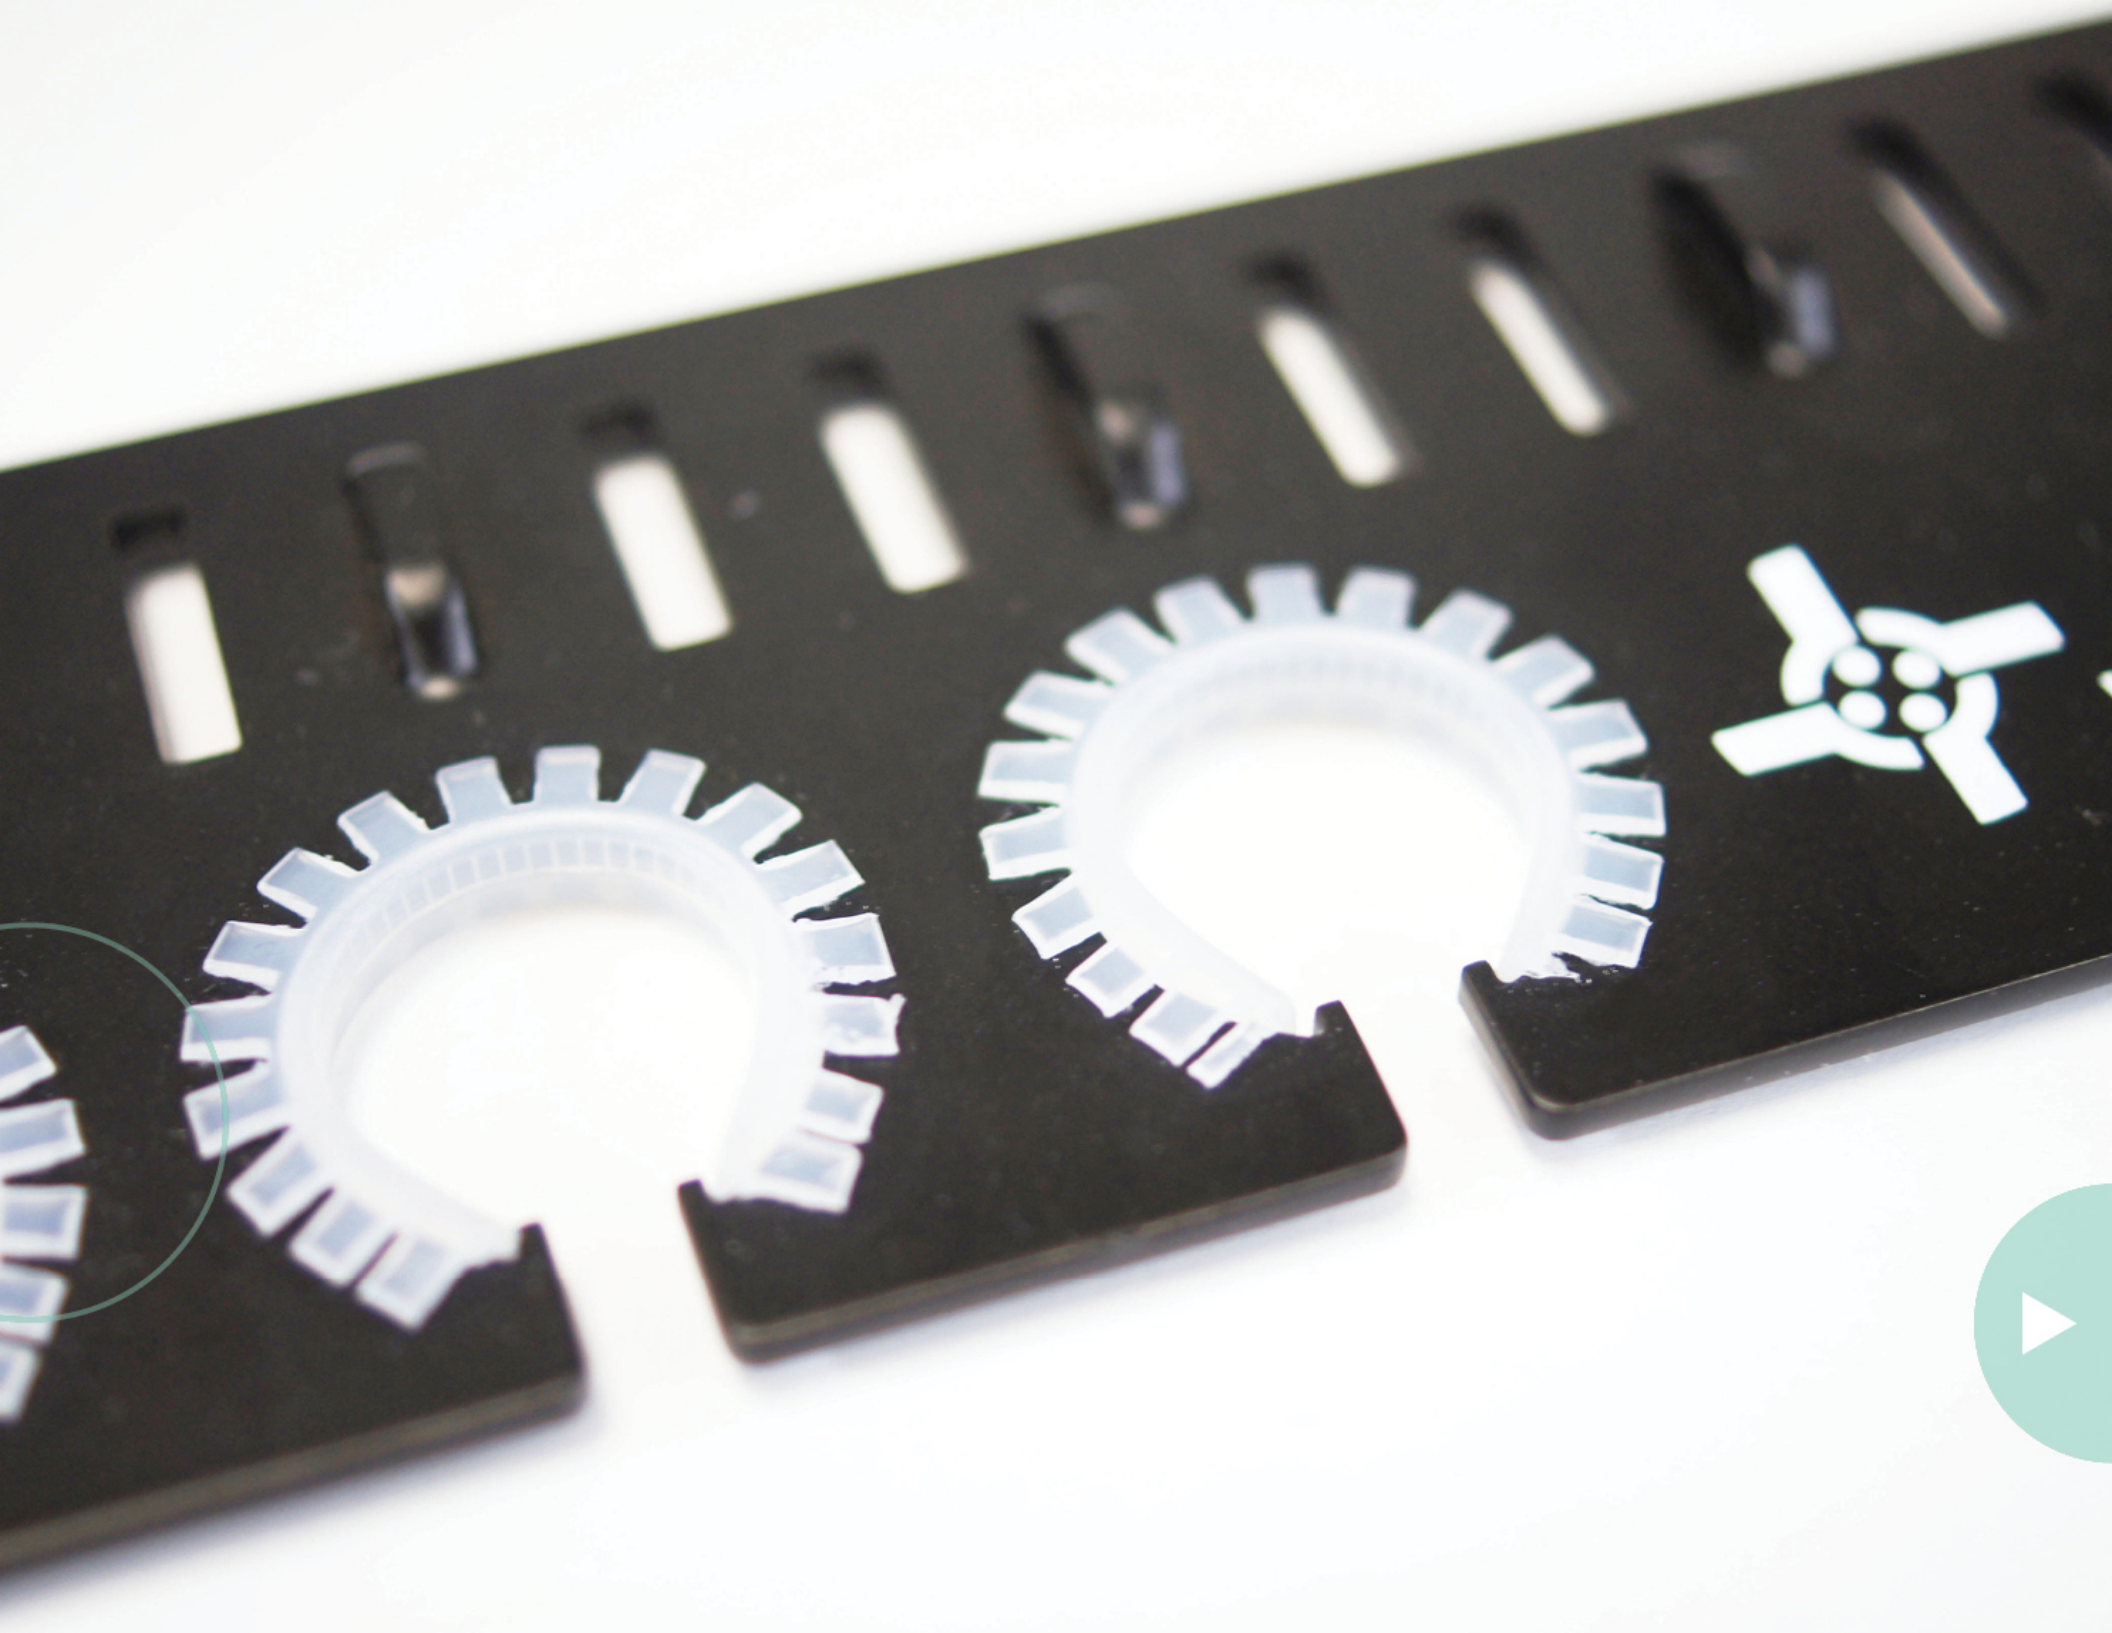

Wire Management^{360°}

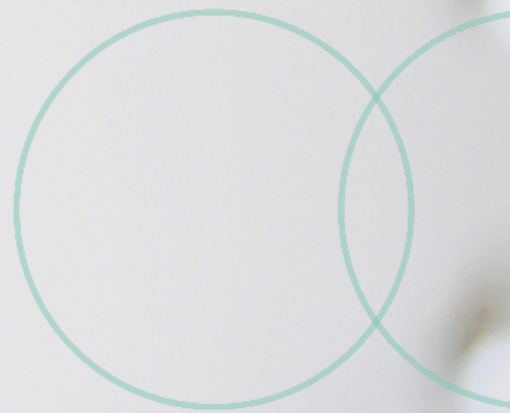

Guide the Cables Whichever Way You Like

Combing cables in style, the EVO™ wire manager revolves around the chassis in all 360° with mounting options from the front or back, up or down and sideways. Protecting and organizing these physical assets is a critical first step to secure the digital lifestyle.

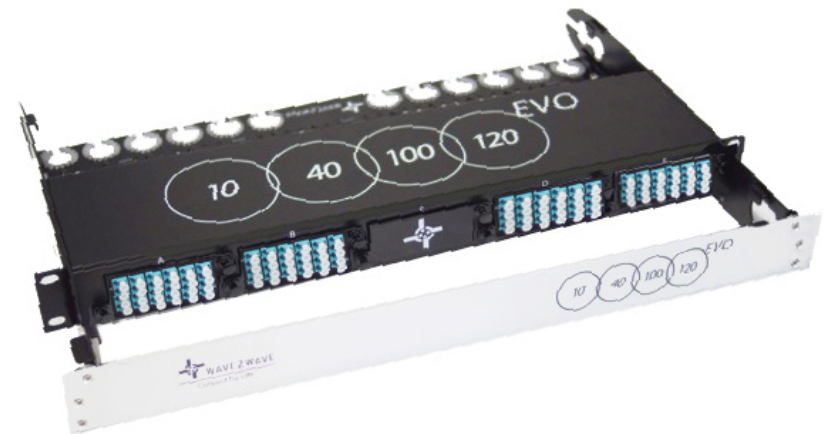

EVO

Intuitive Features

The Subtleties That Intrigue

Designed for human intuition, the EVO™ product family is a creation through vibrant collaboration among our optical, mechanical and graphical design teams. Engineered with meanings and emotions, the EVO™ creates connectivity of a network and sets an enjoyable user experience.

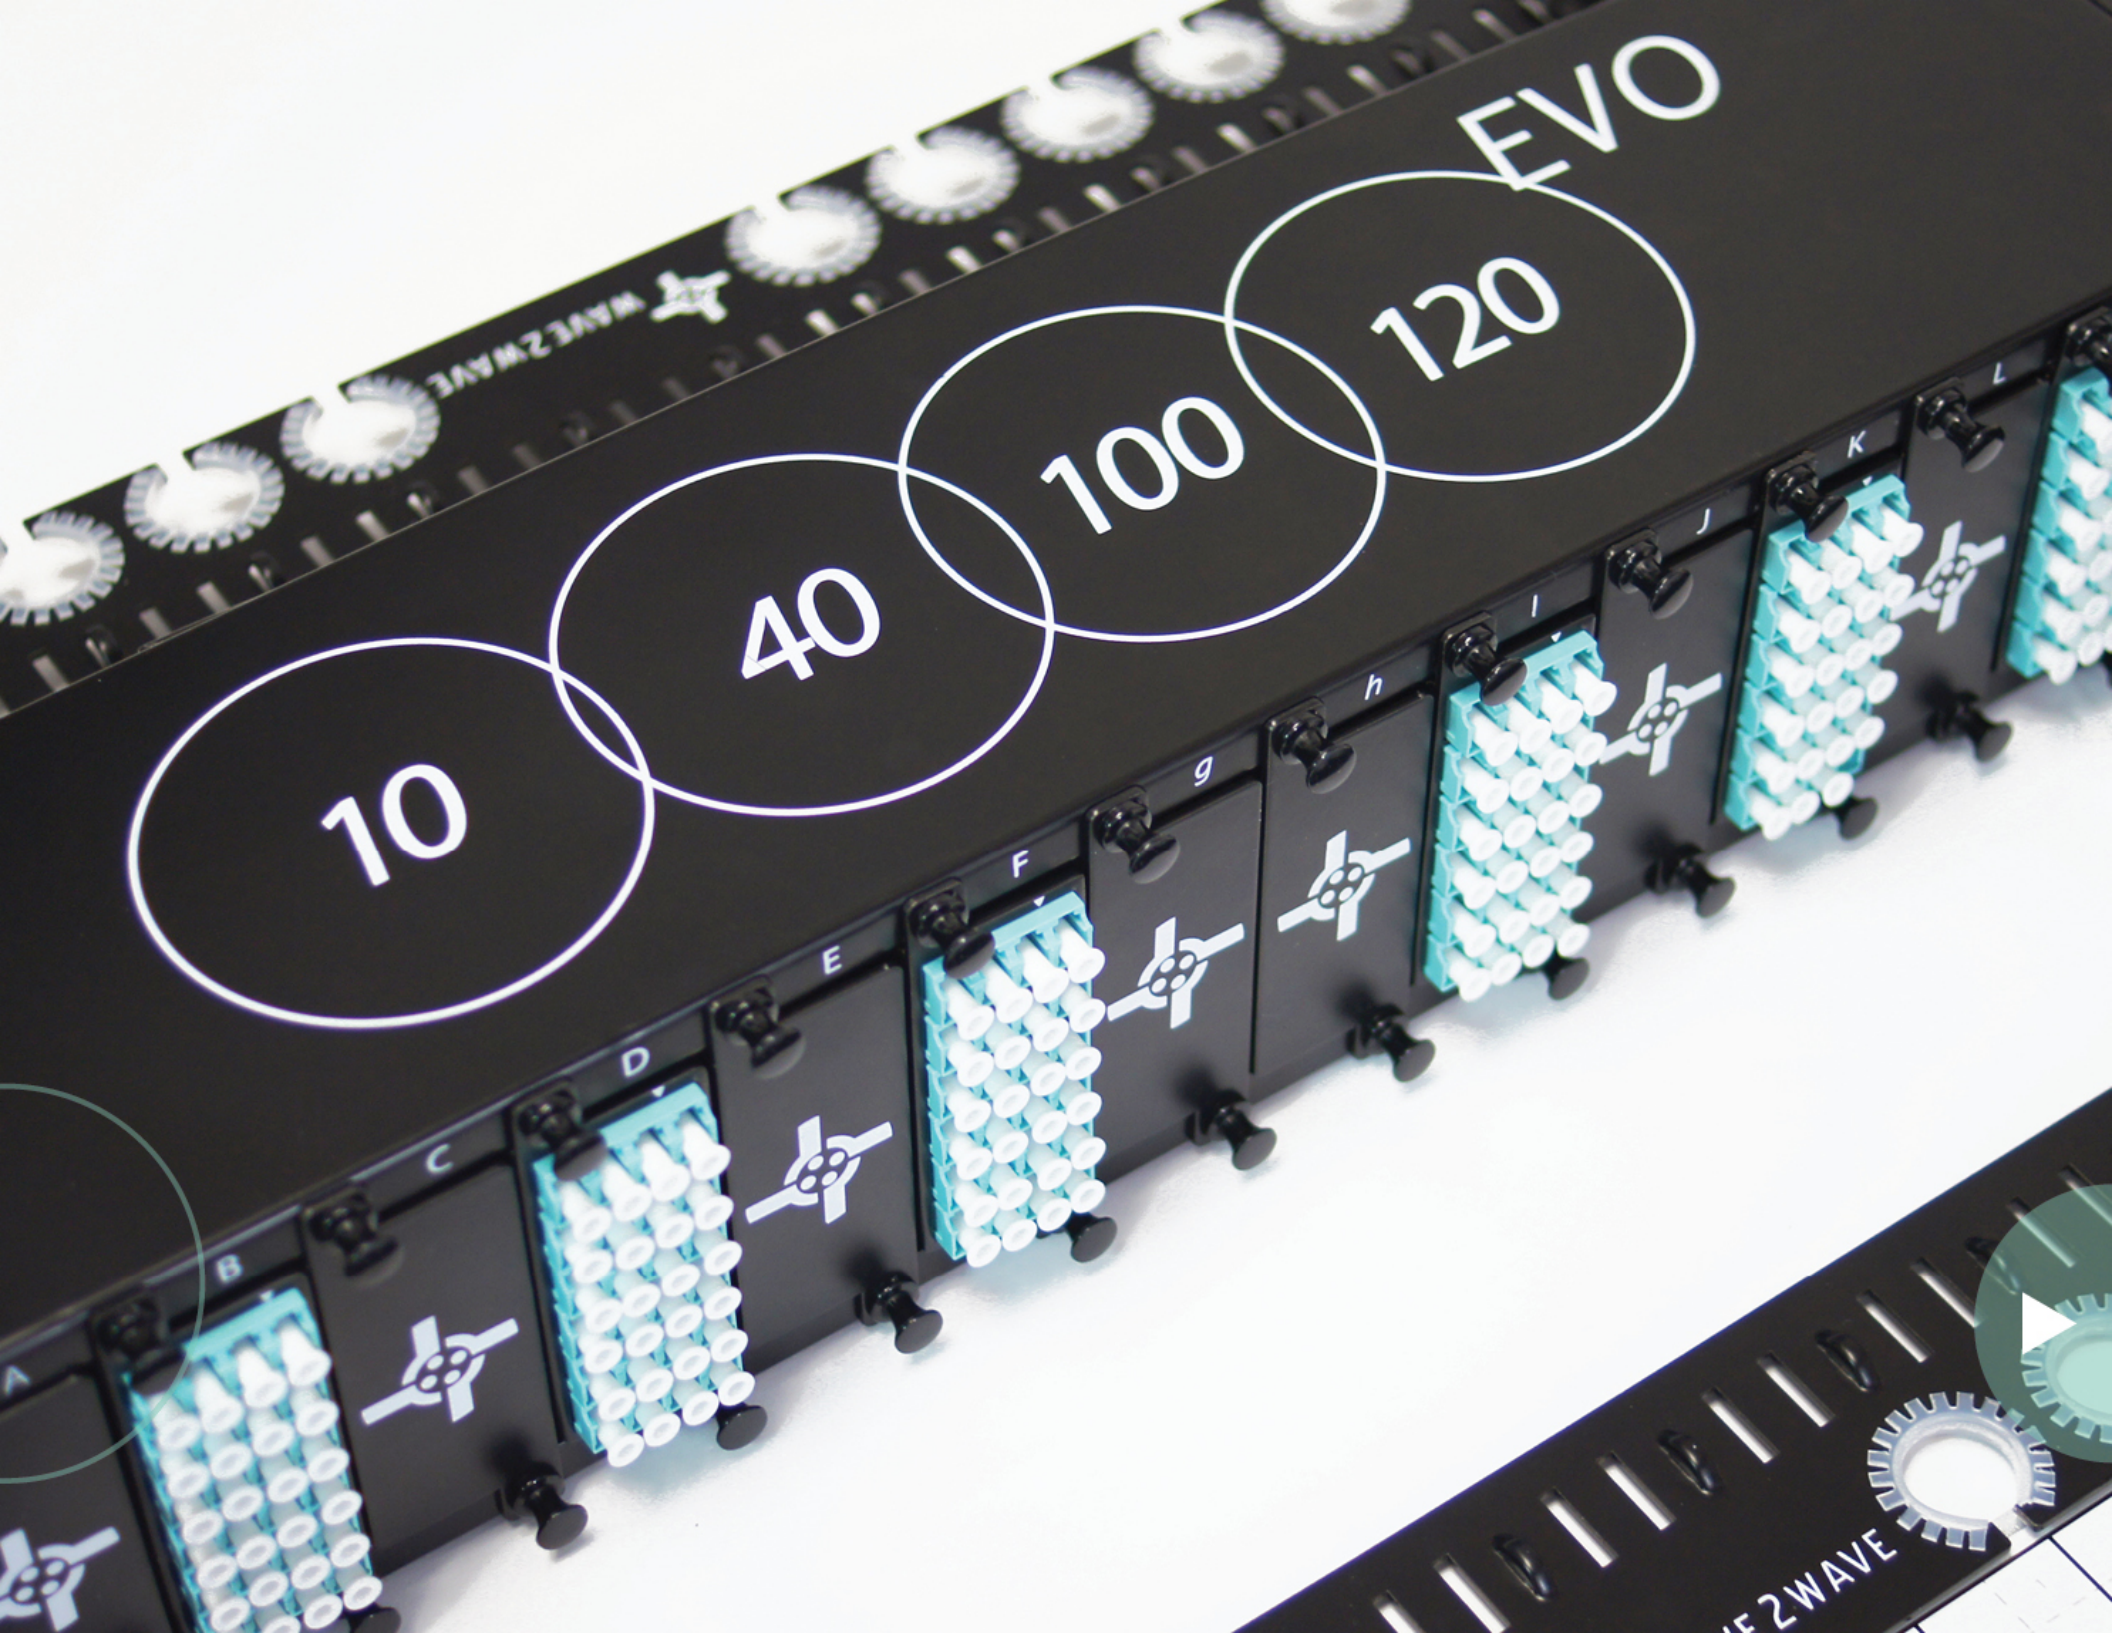

Modular Cassettes

Small Packages, But Large Impact

To build hardware in a small and modular form factor, engineers face physical and practical challenges. The benefits are so paramount - less space, better air flow and reduced environmental impact. Innovation occurs when the stake is high, so was born the EVO for a greater technology evolution.
